

ENVIRONMENT AND LABOR SAFETY POLICY

At Turk Prysmian Kablo ve Sistemleri A.Ş (Turkish Prysmian Cables & Systems Co.), we are aware of our responsibilities towards the environment, our employees and the society.

Pursuing manufacturing activities in an environmentally-sensitive area, our Company aims to monitor and control the negative impacts of our products and activities on environmental and human health and minimize those negative impacts.

In line with the above-described purpose, our primary principles include:

- Making use of natural resources in an efficient way and prevent the pollution;
- Conducting risk analysis on our activities and machinery and controlling and alleviating the impacts thereof on environment, health and safety;
- Preventing possible emergencies and labor accidents before they actually happen;
- Satisfying the legal requirements, Prysmian Group instructions, and customer demands in relation to environment, health and safety aspects;
- Recycling scrape material output of our cable manufacturing processes and having only licensed organizations dispose our dangerous waste;
- Organizing trainings and various activities to build environment, health and safety awareness of our personnel;
- Ensuring that all materials and services that we provide are in conformance with our Environment and Labor Health Management System and making cooperation with our suppliers;
- Performing research and development activities to develop cables that prioritize environmental and labor health aspects.

We use our environmental and labor health targets, determined each year and reviewed by the management, as an important tool to constantly improve our system. Implementation of Environmental and Labor Safety Management and ensuring sustainability and constant improvement thereof is the duty and obligation of all personnel of Turk Prysmian Kablo ve Sistemleri A.Ş (Turkish Prysmian Cables & Systems Co.).
